INDEX OF SUBJECTS AND AUTHORS OF PAPERS

VOLUME XXVII

TRANSACTIONS OF AMERICAN SOCIETY FOR METALS

January, 1939—December, 1939

A

| | |
|--|------|
| Absolute Hardness— <i>E. G. Mahin and G. J. Foss, Jr.</i> | 337 |
| Agents on Low Chromium Steels; Effects of Columbium and Other Addition— <i>Russell Franks</i> | 78 |
| Aging; Color Carbon and— <i>C. L. Shapiro</i> | 666 |
| Alloy Commercial Steels; Study of Carbide Solution in Hypoeutectoid Plain Carbon and Low— <i>R. H. Lauderdale and O. E. Harder</i> | 581 |
| Alloy Additions to Stainless Steels; Effects of Special— <i>Russell Franks</i> | 505 |
| Alloy Steels; Influence of Chromium, Silicon and Aluminum on the Oxidation Resistance of Intermediate— <i>A. E. White, C. L. Clark and C. H. McCollam</i> | 125 |
| Aluminum, Chromium and Silicon on the Oxidation Resistance of Intermediate Alloy Steels; Influence of— <i>A. E. White, C. L. Clark and C. H. McCollam</i> | 125 |
| Aluminum, Cobalt, Titanium and Columbium on the Properties of 80 Nickel-20 Chromium Alloys; Effects of Substantial Additions of— <i>A. L. Sanford and O. E. Harder</i> | 538 |
| Aluminum; Drawing of— <i>L. J. Weber and J. T. Weinzierl</i> | 1052 |
| Aluminum on Cast Corrosion Resisting Steel; Influence of— <i>J. A. Duma</i> | 149 |
| A New 70/30 Nickel-Copper Alloy Subject to Precipitation Hardening— <i>Erich Fetz</i> | 106 |
| Annealing Above the Eutectoid Temperature of Quenched Hypereutectoid Steels; Reactions to— <i>C. R. Austin and M. C. Fetzner</i> | 18 |
| Annual Banquet | 1140 |
| Annual Convention | 1118 |
| Armco Iron; Effect of Type of Cold Deformation on the Recrystallization Properties of— <i>H. F. Kaiser and H. F. Taylor</i> | 227 |
| Austenitic Stainless Steels; Stress-Corrosion Cracking in— <i>S. L. Hoyt and M. A. Scheil</i> | 191 |
| Automatic Polishing of Metallurgical Specimens Using Cast Iron and Lead Taps— <i>T. C. Jarrett</i> | 758 |

B

| | |
|--|-----|
| Body-Centered—Face-Centered Transition in Iron; Effect of H ₂ on— <i>C. B. Post, R. E. Lake and W. R. Ham</i> | 530 |
|--|-----|

C

| | |
|---|-----|
| Carbide Solution in Hypoeutectoid Plain Carbon and Low Alloy Commercial Steels; Study of— <i>R. H. Lauderdale and O. E. Harder</i> | 581 |
| Carbon and Low Alloy Commercial Steels; Study of Carbide Solution in Hypoeutectoid Plain— <i>R. H. Lauderdale and O. E. Harder</i> | 581 |
| Carbon Content on the Rate of Oxidation of Steel in Air at High Temperatures; Effect of— <i>C. A. Siebert</i> | 752 |
| Carbon in Samples of Plain Carbon Open-Hearth Steel; New Method for the Rapid Determination of— <i>B. A. Rogers, Karl Wentzel and J. P. Riott</i> | 175 |
| Carbon-Iron-Molybdenum Alloys; Constitution Diagrams for— <i>J. R. Blanchard, R. M. Parke and A. J. Herzig</i> | 697 |

| | | |
|------|--|------|
| | Carbon Open-Hearth Steel; New Method for the Rapid Determination of Carbon in Samples of Plain— <i>B. A. Rogers, Karl Wentzel and J. P. Riott</i> | 175 |
| | Carbon Steels; Methods of Preventing Shatter Cracks or Flakes in— <i>H. B. Wishart and A. N. Swanson</i> | 784 |
| | Carbon-1.5 Per Cent Chromium Steel; Some Effects of Deoxidizers in Low— <i>Walter Crafts and J. L. Lamont</i> | 268 |
| | Cast Corrosion Resisting Steel; Influence of Aluminum on— <i>J. A. Duma</i> | 149 |
| | Characteristics of 5.0 and 7.0 Per Cent Chromium Steels with Varying Molybdenum and Vanadium Content— <i>W. G. Hildorf, C. L. Clark and A. E. White</i> | 1090 |
| 337 | Chromium, Silicon and Aluminum on the Oxidation Resistance of Intermediate Alloy Steels; Influence of— <i>A. E. White, C. L. Clark and C. H. McCollam</i> | 125 |
| 78 | Chromium Steel; Some Effects of Deoxidizers in Low Carbon-1.5 Per Cent— <i>Walter Crafts and J. L. Lamont</i> | 268 |
| 666 | Chromium Steels; Effects of Columbium and Other Addition Agents on Low— <i>Russell Franks</i> | 78 |
| 581 | Chromium Steels with Varying Molybdenum and Vanadium Content; Characteristics of 5.0 and 7.0 Per Cent— <i>W. G. Hildorf, C. L. Clark and A. E. White</i> | 1090 |
| 505 | Cobalt, Aluminum, Titanium and Columbium on the Properties of 80 Nickel-20 Chromium Alloys; Effects of Substantial Additions of— <i>A. L. Sanford and O. E. Harder</i> | 538 |
| 125 | Cold Deformation on the Recrystallization Properties of Armco Iron; Effect of Type of— <i>H. F. Kaiser and H. F. Taylor</i> | 227 |
| | Cold Work; Metallographic Approach to the Study of the Sensitivity of Steel to— <i>H. K. Work and S. L. Case</i> | 771 |
| | Color Carbon and Aging— <i>C. L. Shapiro</i> | 666 |
| | Columbium, Aluminum, Cobalt and Titanium on the Properties of 80 Nickel-20 Chromium Alloys; Effects of Substantial Additions of— <i>A. L. Sanford and O. E. Harder</i> | 538 |
| 106 | Columbium and Other Addition Agents on Low Chromium Steels— <i>Russell Franks</i> | 78 |
| 18 | Commercial Steels; Study of Carbide Solution in Hypoeutectoid Plain Carbon and Low Alloy— <i>R. H. Lauderdale and O. E. Harder</i> | 581 |
| 1140 | Constant Temperatures; Prevention of Flakes by Holding Railroad Rails at Various— <i>R. E. Cramer and E. C. Bast</i> | 923 |
| 1118 | Constitution Diagrams for Iron-Carbon-Molybdenum Alloys— <i>J. R. Blanchard, R. M. Parke and A. J. Herzig</i> | 697 |
| 227 | Cooling Rate; Effects of Fiber on the Notch Toughness of Mild Steel as Influenced by— <i>O. W. Ellis and J. E. McDonell</i> | 61 |
| 191 | Copper-Nickel Alloy Subject to Precipitation Hardening; A New 70/30— <i>Erich Fets</i> | 106 |
| 758 | Copper (OFHC); Some Properties of Oxygen-Free High Conductivity— <i>C. G. Goetzel</i> | 458 |
| | Corrosion Resisting Steel; Influence of Aluminum on Cast— <i>J. A. Duma</i> | 149 |
| | Cutting Steels; Development in Molybdenum High Speed— <i>W. R. Breeler</i> | 289 |
| | Cylinders; Hardness Gradients in Tempered Steel— <i>C. A. Rowe and R. A. Ragatz</i> | 719 |

D

| | | |
|-----|---|-----|
| | Deformation on the Recrystallization Properties of Armco Iron; Effect of Type of Cold— <i>H. F. Kaiser and H. F. Taylor</i> | 227 |
| | Deoxidizers in Low Carbon-1.5 Per Cent Chromium Steel; Some Effects of— <i>Walter Crafts and J. L. Lamont</i> | 268 |
| | Development in Molybdenum High Speed Cutting Steels— <i>W. R. Breeler</i> | 289 |
| 175 | Diamond Pyramid Hardness Scales; Relation Between the Rockwell "C" and— <i>Howard Scott and T. H. Gray</i> | 363 |
| 697 | Diesel Engine Ocean Liner; Internal Stresses in Piston Rods of a Large— <i>George Sachs</i> | 821 |

| | |
|---|------|
| Diffusion in Solid Metals; Influence of Microstructure Upon the Process of— <i>F. N. Rhines and Cyril Wells</i> | 625 |
| Discussion of Leaded Steels— <i>F. J. Robbins and G. R. Caskey</i> | 887 |
| Drawing of Aluminum— <i>L. J. Weber and J. T. Weinzierl</i> | 1052 |

E

| | |
|---|------|
| Effect of Carbon Content on the Rate of Oxidation of Steel in Air at High Temperatures— <i>C. A. Siebert</i> | 752 |
| Effect of H_2 on Body-Centered-Face-Centered Transition in Iron— <i>C. B. Post, R. E. Lake and W. R. Ham</i> | 530 |
| Effect of Type of Cold Deformation on the Recrystallization Properties of Armco Iron— <i>H. F. Kaiser and H. F. Taylor</i> | 227 |
| Effects of Columbium and Other Addition Agents on Low Chromium Steels— <i>Russell Franks</i> | 78 |
| Effects of Deoxidizers in Low Carbon-1.5 Per Cent Chromium Steel; Some— <i>Walter Crafts and J. L. Lamont</i> | 268 |
| Effects of Fiber on the Notch Toughness of Mild Steel as Influenced by Cooling Rate— <i>O. W. Ellis and J. E. McDonell</i> | 61 |
| Effects of Special Alloy Additions to Stainless Steels— <i>Russell Franks</i> | 505 |
| Effects of Substantial Additions of Aluminum, Cobalt, Titanium and Columbium on the Properties of 80 Nickel-20 Chromium Alloys— <i>A. L. Sanford and O. E. Harder</i> | 538 |
| Election of Officers | 1138 |
| Erosion of Machine Gun Barrels; White Layer Structure in the— <i>W. H. Snair and W. P. Wood</i> | 608 |
| Eutectoid Temperature of Quenched Hypereutectoid Steels; Reactions to Annealing Above the— <i>C. R. Austin and M. C. Fetzer</i> | 18 |

F

| | |
|---|-----|
| Fiber on the Notch Toughness of Mild Steel as Influenced by Cooling Rate; Effects of— <i>O. W. Ellis and J. E. McDonell</i> | 61 |
| Flakes by Holding Railroad Rails at Various Constant Temperatures; Prevention of— <i>R. E. Cramer and E. C. Bast</i> | 923 |
| Flakes by Treating Molten Steel with Hydrogen and the Time of Cooling Necessary to Prevent Their Formation; Production of— <i>R. E. Cramer and E. C. Bast</i> | 433 |
| Flakes in Carbon Steels; Methods of Preventing Shatter Cracks or— <i>H. B. Wishart and A. N. Swanson</i> | 784 |
| Flame; Selective Hardening with the Oxyacetylene— <i>R. L. Rolf</i> | 43 |

G

| | |
|---|-----|
| Graphitizing Rate and Nodule Number— <i>H. A. Schwartz and M. K. Barnett</i> | 570 |
| Gun Barrels; White Layer Structure in the Erosion of Machine— <i>W. H. Snair and W. P. Wood</i> | 608 |

H

| | |
|---|------|
| H_2 on Body-Centered-Face-Centered Transition in Iron; Effect of— <i>C. B. Post, R. E. Lake and W. R. Ham</i> | 530 |
| Hardenability Test for Shallow Hardening Steels— <i>W. E. Jominy</i> | 1072 |
| Hardened High Speed Steel by the Use of Molten Cyanides; Introductory Study of the Nitriding of— <i>J. G. Morrison and J. P. Gill</i> | 935 |
| Hardening; A New 70/30 Nickel-Copper Alloy Subject to Precipitation— <i>Erich Fetz</i> | 106 |
| Hardening Steels; Hardenability Test for Shallow— <i>W. E. Jominy</i> | 1072 |
| Hardening with the Oxyacetylene Flame; Selective— <i>R. L. Rolf</i> | 43 |
| Hardness; Absolute— <i>E. G. Mahin and G. J. Foss, Jr.</i> | 337 |

| | | |
|------|---|------|
| 625 | Hardness Gradients in Tempered Steel Cylinders— <i>C. A. Rowe and R. A. Ragatz</i> | 719 |
| 887 | Hardness Scales; Relation Between the Rockwell "C" and Diamond Pyramid— <i>Howard Scott and T. H. Gray</i> | 363 |
| 1052 | High Conductivity Copper (OFHC); Some Properties of Oxygen-Free— <i>C. G. Goetzel</i> | 458 |
| | High Speed Cutting Steels; Development in Molybdenum— <i>W. R. Breeler</i> | 289 |
| | High Speed Steel by the Use of Molten Cyanides; Introductory Study of the Nitriding of Hardened— <i>J. G. Morrison and J. P. Gill</i> | 935 |
| 752 | High Speed Steel; Tempering of— <i>Morris Cohen and P. K. Koh</i> | 1015 |
| 530 | Hypereutectoid Steels; Reactions to Annealing Above the Eutectoid Temperature of Quenched— <i>C. R. Austin and M. C. Fetzer</i> | 18 |
| 227 | Hypoeutectoid Plain Carbon and Low Alloy Commercial Steels; Study of Carbide Solution in— <i>R. H. Lauderdale and O. E. Harder</i> | 581 |

I

| | | |
|------|--|-----|
| 268 | Identification of Inclusions in Steel by the Use of Reflected Polarized Light— <i>M. A. Scheil, Mary Baeyertz and J. R. Vilella</i> | 479 |
| 61 | Influence of Aluminum on Cast Corrosion Resisting Steel— <i>J. A. Duma</i> | 149 |
| 505 | Influence of Chromium, Silicon and Aluminum on the Oxidation Resistance of Intermediate Alloy Steels— <i>A. E. White, C. L. Clark and C. H. McCollam</i> | 125 |
| 538 | Inclusions in Steel by the Use of Reflected Polarized Light; Identification of— <i>M. A. Scheil, Mary Baeyertz and J. R. Vilella</i> | 479 |
| 1138 | Influence of Microstructure Upon the Process of Diffusion in Solid Metals— <i>F. N. Rhines and Cyril Wells</i> | 625 |
| 608 | Internal Stresses in Piston Rods of a Large Diesel Engine Ocean Liner— <i>George Sachs</i> | 821 |
| 18 | Introductory Study of the Nitriding of Hardened High Speed Steel by the Use of Molten Cyanides— <i>J. G. Morrison and J. P. Gill</i> | 935 |
| | Iron-Carbon-Molybdenum Alloys; Constitution Diagrams for— <i>J. R. Blanchard, R. M. Parke and A. J. Herzig</i> | 697 |
| 61 | Iron; Effect of H ₂ on Body-Centered-Face-Centered Transition in— <i>C. B. Post, R. E. Lake and W. R. Ham</i> | 530 |
| 923 | Iron; Effect of Type of Cold Deformation on the Recrystallization Properties of Armco— <i>H. F. Kaiser and H. F. Taylor</i> | 227 |
| 433 | Isothermal Transformation in Steels— <i>E. S. Davenport</i> | 837 |

L

| | | |
|-----|--|-----|
| 784 | Leaded Steels; Discussion of— <i>F. J. Robbins and G. R. Caskey</i> | 887 |
| 43 | Low Alloy Commercial Steels; Study of Carbide Solution in Hypoeutectoid Plain Carbon and— <i>R. H. Lauderdale and O. E. Harder</i> ... | 581 |
| | Low Carbon-1.5 Per Cent Chromium Steel; Some Effects of Deoxidizers in— <i>Walter Crafts and J. L. Lamont</i> | 268 |
| 570 | Low Chromium Steels; Effects of Columbium and Other Addition Agents on— <i>Russell Franks</i> | 78 |

M

| | | |
|------|---|-----|
| | Machine Gun Barrels; White Layer Structure in the Erosion of— <i>W. H. Snair and W. P. Wood</i> | 608 |
| 530 | Magnetically Soft Materials— <i>T. D. Yensen</i> | 797 |
| 1072 | Metallographic Approach to the Study of the Sensitivity of Steel to Cold Work— <i>H. K. Work and S. L. Case</i> | 771 |
| 935 | Metallographic Specimens; Methods of the Preparation of— <i>G. A. Ellinger and J. S. Acken</i> | 382 |
| 106 | Metallurgical Specimens Using Cast Iron and Lead Laps; Automatic Polishing of— <i>T. C. Jarrett</i> | 758 |
| 1072 | Method for the Preparation of Metallographic Specimens— <i>G. A. Ellinger and J. S. Acken</i> | 382 |
| 43 | | |
| 337 | | |

| | |
|--|------|
| Methods of Preventing Shatter Cracks or Flakes in Carbon Steels— <i>H. B. Wishart and A. N. Swanson</i> | 784 |
| Microstructure Upon the Process of Diffusion in Solid Metals; Influence of— <i>F. N. Rhines and Cyril Wells</i> | 625 |
| Molten Cyanides; Introductory Study of the Nitriding of Hardened High Speed Steel by the Use of— <i>J. G. Morrison and J. P. Gill</i> | 935 |
| Molten Steel with Hydrogen and the Time of Cooling Necessary to Pre- vent their Formation; Production of Flakes by Treating— <i>R. E. Cramer and E. C. Bast</i> | 433 |
| Molybdenum and Vanadium Content; Characteristics of 5.0 and 7.0 Per Cent Chromium Steels with Varying— <i>W. G. Hildorf, C. L. Clark and A. E. White</i> | 1090 |
| Molybdenum High Speed Cutting Steels; Development in— <i>W. R. Breeler</i> | 289 |
| Molybdenum-Iron-Carbon Alloys; Constitution Diagrams for— <i>J. R. Blanchard, R. M. Parke and A. J. Herzig</i> | 697 |

N

| | |
|---|-----|
| New Method for the Rapid Determination of Carbon in Samples of Plain Carbon Open-Hearth Steel— <i>B. A. Rogers, Karl Wentzel and J. P. Riott</i> | 175 |
| Nickel-Copper Alloy Subject to Precipitation Hardening; A New 70/30— <i>Erich Fetz</i> | 106 |
| Nitriding of Hardened High Speed Steel by the Use of Molten Cyanides; Introductory Study of the— <i>J. G. Morrison and J. P. Gill</i> | 935 |
| Nodule Number; Graphitizing Rate and— <i>H. A. Schwartz and M. K. Barnett</i> | 570 |
| Notch Toughness of Mild Steel as Influenced by Cooling Rate; Effects of Fiber on the— <i>O. W. Ellis and J. E. McDonell</i> | 61 |

O

| | |
|--|-----|
| Observations on the Passivity of Stainless Steels; Some— <i>J. N. Ostrofsky</i> | 739 |
| Open-Hearth Steel; New Method for the Rapid Determination of Car- bon in Samples of Plain Carbon— <i>B. A. Rogers, Karl Wentzel and J. P. Riott</i> | 175 |
| Oxidation of Steel in Air at High Temperatures; Effect of Carbon Con- tent on the Rate of— <i>C. A. Siebert</i> | 752 |
| Oxidation Resistance of Intermediate Alloy Steels; Influence of Chro- mium, Silicon and Aluminum on the— <i>A. E. White, C. L. Clark and C. H. McCollam</i> | 125 |
| Oxyacetylene Flame; Selective Hardening with the— <i>R. L. Rolf</i> | 43 |
| Oxygen-Free High Conductivity Copper (OFHC); Some Properties of— <i>C. G. Goetzl</i> | 458 |

P

| | |
|--|-----|
| Passivity of Stainless Steels; Some Observations on the— <i>J. N. Ostrofsky</i> | 739 |
| Piston Rods of a Large Diesel Engine Ocean Liner; Internal Stresses in — <i>George Sachs</i> | 821 |
| Plain Carbon and Low Alloy Commercial Steels; Study of Carbide Solu- tion in Hypoeutectoid— <i>R. H. Lauderdale and O. E. Harder</i> | 581 |
| Plain Carbon Open-Hearth Steel; New Method for the Rapid Determina- tion of Carbon in Samples of— <i>B. A. Rogers, Karl Wentzel and J. P. Riott</i> | 175 |
| Polarized Light; Identification of Inclusions in Steel by the Use of Reflected— <i>M. A. Scheil, Mary Baeyerzt and J. R. Vilella</i> | 479 |
| Polishing of Metallurgical Specimens Using Cast Iron and Lead Laps; Automatic— <i>T. C. Jarrett</i> | 758 |
| Possible Uses of Radioactive Substances in the Testing of Metals— <i>H. F. Kaiser</i> | 403 |

| | | |
|------|--|------|
| 784 | Precipitation Hardening; A New 70/30 Nickel-Copper Alloy Subject to— <i>Erich Fetz</i> | 106 |
| | President's Annual Address | 1123 |
| 625 | Preventing Shatter Cracks or Flakes in Carbon Steels; Methods of— <i>H. B. Wishart and A. N. Swanson</i> | 784 |
| 935 | Prevention of Flakes by Holding Railroad Rails at Various Constant Temperatures— <i>R. E. Cramer and E. C. Bast</i> | 923 |
| 433 | Production of Flakes by Treating Molten Steel with Hydrogen and the Time of Cooling Necessary to Prevent their Formation— <i>R. E. Cramer and E. C. Bast</i> | 433 |
| 1090 | Properties of Armco Iron; Effect of Type of Cold Deformation on the Recrystallization— <i>H. F. Kaiser and H. F. Taylor</i> | 227 |
| 289 | Properties of Oxygen-Free High Conductivity Copper (OFHC)— <i>C. G. Goetzel</i> | 458 |
| 697 | Pyramid Hardness Scales; Relation Between the Rockwell "C" and Diamond— <i>Howard Scott and T. H. Gray</i> | 363 |

Q

| | | |
|-----|--|----|
| 175 | Quenched Hypereutectoid Steels; Reactions to Annealing Above the Eutectoid Temperature of— <i>C. R. Austin and M. C. Fetzner</i> | 18 |
|-----|--|----|

R

| | | |
|-----|---|------|
| 935 | Radioactive Substances in the Testing of Metals; Possible Uses of— <i>H. F. Kaiser</i> | 403 |
| 570 | Railroad Rails at Various Constant Temperatures; Prevention of Flakes by Holding— <i>R. E. Cramer and E. C. Bast</i> | 923 |
| 61 | Rapid Determination of Carbon in Samples of Plain Carbon Open-Hearth Steel; New Method for the— <i>B. A. Rogers, Karl Wentzel and J. P. Riott</i> | 175 |
| 739 | Rate of Oxidation of Steel in Air at High Temperatures; Effect of Carbon Content on the— <i>C. A. Siebert</i> | 752 |
| 175 | Reactions to Annealing Above the Eutectoid Temperature of Quenched Hypereutectoid Steels— <i>C. R. Austin and M. C. Fetzner</i> | 18 |
| 752 | Recrystallization Properties of Armco Iron; Effect of Type of Cold Deformation on the— <i>H. F. Kaiser and H. F. Taylor</i> | 227 |
| | Relation Between the Rockwell "C" and Diamond Pyramid Hardness Scales— <i>Howard Scott and T. H. Gray</i> | 363 |
| | Report of Officers | 1118 |
| 125 | Resistance of Intermediate Alloy Steels; Influence of Chromium, Silicon and Aluminum on the Oxidation— <i>A. E. White, C. L. Clark and C. H. McCollam</i> | 125 |
| 43 | Resisting Steel; Influence of Aluminum on Cast Corrosion— <i>J. A. Duma</i> | 149 |
| 458 | Rockwell "C" and Diamond Pyramid Hardness Scales; Relation Between the— <i>Howard Scott and T. H. Gray</i> | 363 |

S

| | | |
|-----|---|------|
| 739 | Science and Steel in Industrial Democracy— <i>Raoul E. Desvernine</i> | 1151 |
| 821 | Secretary's Annual Report | 1130 |
| 581 | Selective Hardening with the Oxyacetylene Flame— <i>R. L. Rolf</i> | 43 |
| | Sensitivity of Steel to Cold Work; Metallographic Approach to the Study of the— <i>H. K. Work and S. L. Case</i> | 771 |
| 175 | Shallow Hardening Steels; Hardenability Test for— <i>W. E. Jominy</i> | 1072 |
| 479 | Shatter Cracks or Flakes in Carbon Steels; Methods of Preventing— <i>H. B. Wishart and A. N. Swanson</i> | 784 |
| 758 | Silicon, Chromium and Aluminum on the Oxidation Resistance of Intermediate Alloy Steels; Influence of— <i>A. E. White, C. L. Clark and C. H. McCollam</i> | 125 |
| 403 | Softening Rate of a Steel When Tempered from Different Initial Structures— <i>E. H. Engel</i> | 1 |

| | |
|---|------|
| Soft Materials; Magnetically— <i>T. D. Yensen</i> | 797 |
| Solid Metals; Influence of Microstructure Upon the Process of Diffusion in— <i>F. N. Rhines and Cyril Wells</i> | 625 |
| Some Effects of Deoxidizers in Low Carbon-1.5 Per Cent Chromium Steel — <i>Walter Crafts and J. L. Lamont</i> | 268 |
| Some Observations on the Passivity of Stainless Steels— <i>J. N. Ostrofsky</i> | 739 |
| Some Properties of Oxygen-Free High Conductivity Copper (OFHC)— <i>C. G. Goetzel</i> | 458 |
| Special Alloy Additions to Stainless Steels; Effects of— <i>Russell Franks</i> | 505 |
| Specimens; Method for the Preparation of Metallographic— <i>G. A. Ellinger</i> and <i>J. S. Acken</i> | 382 |
| Stainless Steels; Effects of Special Alloy Additions to— <i>Russell Franks</i> | 505 |
| Stainless Steels; Some Observations on the Passivity of— <i>J. N. Ostrofsky</i> | 739 |
| Stainless Steels; Stress-Corrosion Cracking in Austenitic— <i>S. L. Hoyt</i> and <i>M. A. Scheil</i> | 191 |
| Steel Cylinders; Hardness Gradients in Tempered— <i>C. A. Rowe and</i> <i>R. A. Ragatz</i> | 719 |
| Steel in Air at High Temperatures; Effect of Carbon Content on the Rate of Oxidation of— <i>C. A. Siebert</i> | 752 |
| Steel in Industrial Democracy; Science and— <i>Raoul E. Desvernine</i> | 1151 |
| Steel as Influenced by Cooling Rate; Effects of Fiber on the Notch Tough- ness of Mild— <i>O. W. Ellis and J. E. McDonell</i> | 61 |
| Steel; Influence of Aluminum on Cast Corrosion Resisting— <i>J. A. Duma</i> | 149 |
| Steel; New Method for the Rapid Determination of Carbon in Samples of Plain Carbon Open-Hearth— <i>B. A. Rogers, Karl Wentzel and</i> <i>J. P. Riott</i> | 175 |
| Steel; Some Effects of Deoxidizers in Low Carbon-1.5 Per Cent Chro- mium— <i>Walter Crafts and J. L. Lamont</i> | 268 |
| Steel when Tempered from Different Initial Structures; Softening Rate of a— <i>E. H. Engel</i> | 1 |
| Steels; Discussion of Lead— <i>F. J. Robbins and G. R. Caskey</i> | 887 |
| Steels; Effects of Columbium and Other Addition Agents on Low Chro- mium— <i>Russell Franks</i> | 78 |
| Steels; Influence of Chromium, Silicon and Aluminum on the Oxidation Resistance of Intermediate Alloy— <i>A. E. White, C. L. Clark and</i> <i>C. H. McCollam</i> | 125 |
| Steels; Isothermal Transformation in— <i>E. S. Davenport</i> | 837 |
| Steels; Reactions to Annealing Above the Eutectoid Temperature of Quenched Hypereutectoid— <i>C. R. Austin and M. C. Fetzer</i> | 18 |
| Steels; Stress-Corrosion Cracking in Austenitic Stainless— <i>S. L. Hoyt</i> and <i>M. A. Scheil</i> | 191 |
| Steels; Study of Carbide Solution in Hypoeutectoid Plain Carbon and Low Alloy Commercial Steels— <i>R. H. Lauderdale and O. E. Harder</i> | 581 |
| Stress-Corrosion Cracking in Austenitic Stainless Steels— <i>S. L. Hoyt</i> and <i>M. A. Scheil</i> | 191 |
| Stresses in Piston Rods of a Large Diesel Engine Ocean Liner; Internal — <i>George Sachs</i> | 821 |
| Structure in the Erosion of Machine Gun Barrels; White Layer— <i>W. H.</i> <i>Snair and W. P. Wood</i> | 608 |
| Structures; Softening Rate of a Steel when Tempered from Different Initial— <i>E. H. Engel</i> | 1 |
| Study of Carbide Solution in Hypoeutectoid Plain Carbon and Low Alloy Commercial Steels— <i>R. H. Lauderdale and O. E. Harder</i> | 581 |
| Substantial Additions of Aluminum, Cobalt, Titanium and Columbium on the Properties of 80 Nickel-20 Chromium Alloys; Effects of— <i>A. L.</i> <i>Sanford and O. E. Harder</i> | 538 |
